DETAILED ACTION

Claims 1-11, 17-29 and 48-52 are pending in this application.

Action Summary

1. The rejection of claims 1-9, 11, 17-29 and 48-52 under 35 U.S.C. 102(e) as being anticipated by Drunnen et al. is being maintained for the reasons stated in the office action dated March 9, 2004.
2. The rejection of claims 10 and 49-52 under 35 U.S.C. 103(a) over Policappelli et al. is hereby withdrawn as the prior art does not teach the extract being obtained from an agricultural by-product.

Response to Arguments

3. Applicant's arguments filed August 9, 2005 have been fully considered but they are not persuasive.

Applicants argue that the prior art of Drunnen et al. does not teach a method of detoxifying the extract. Examiner agrees in part. While the prior art does not specifically teach a detoxification method it would be understood by one of ordinary skill, that when preparing an extract from waste material to be used for enriching foods and beverage that one would want to remove all potential toxifying elements. Furthermore, the process as claimed contains a purification procedure for removing unwanted constituents.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Drunnen et al. (US 6,572,915 B1).

See office action dated March 9, 2004 for statement of rejection.

The prior art does not disclose a detoxification method as claimed in claim 10.

It would have been obvious to one of ordinary skill in the art to incorporate a detoxification method when preparing an extract from waste products. As taught in Drunnen in column 3, lines 41-43, a purification step may be used for the removal of unwanted constituents.

Conclusion

5. Claims 1-11, 17-29 and 48-52 are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1616

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
